

Supervised Agricultural Experience

## SAMPLE GRADING POLICY #2

### CLASSROOM ACADEMIC PERFORMANCE 75%

94-100	A
86-93	B
75-85	C
67-74	D
<67	F

### OTHER GRADING FACTORS 25%

Participation	5%
Lab/Greenhouse Work	10%
SAE Record Book	5%
SAE Visit	5%

**\*Example:** A student with an average of 93% in the classroom added with a 100% in participation, a 95% average in the lab, a 100% for his/her record book, and a 100% average from a visit to his/her SAE would be graded in the following manner:

Classroom	93%	x	75%	=	69.75
Participation	100%	x	5%	=	5.00
Lab/greenhouse	95%	x	10%	=	9.50
SAE record book	100%	x	5%	=	5.00
SAE visit	100%	x	5%	=	5.00

Total points	94.25
--------------	-------

This student's grade would be a 94.25 or an A-, rather than a 93.00 or a B+.

**Note:** Considerations are made for special needs students with individual education programs (IEPs). Some IEPs state that special needs students might only master 70% of the classroom work. Using this grading example, the "Other Grading Factors" are adjusted upward to account for a larger portion of the student's grade. Since all special needs students have different IEPs, there may be a different grading scale for each one.
